# Creating DocX Templates

Instructor: Adrian Song

Tutorial Summary

From version 7.4 onwards end users are able to create report templates using the Microsoft Word XML document (.docx) format and have them rendered in the Repertoire Designer environment.

1. Report template creation
2. Mapping a data source to the report template
3. Adding sections to a report template
4. Sorting and Grouping of data
5. Aliasing
6. Basic aggregate functions

The Word 2007 Document file format (.docx) was introduced in Microsoft Office 2007. For users running earlier versions of Microsoft Office a converter is required and can be downloaded at the following link:

http://www.microsoft.com/downloads/details.aspx?FamilyId=941b3470-3ae9-4aee-8f43-c6bb74cd1466&displaylang=en

Tutorial Artifacts

The tutorial Ex_DocX.zip file consists of the reference documentation found in the "workspace" directory plus the required assets to carry out the self tutorial. It is assumed that the end user is familiar with Microsoft Office Word environment.
