

Hotfixes

Known Issues and Patches in ERS 7.1

- **Render Report Template with Parameters to Target via ERSCient**

Problem Description:

Rendering a report template contain parameters via the ERSCient API to a configured Target failed with the error message below.

Error Message:

```
2007-09-03 12:58:27,000,btpool0-5 - /target/output1,ERROR,
object.ObjectDataSource - JavaScript error: Execute error
org.mozilla.javascript.EvaluatorException: Compilation produced 2 syntax errors. :
line 1 : null
Execute error
org.mozilla.javascript.EvaluatorException: Compilation produced 2 syntax errors. :
line 1 : null
at com.elixirtech.js.JavaScriptEngine.execute(Unknown Source)
at com.elixirtech.data2.datasource.object.ObjectDataSource.pushTo(Unknown
Source)
.....
```

Patch Resolution:

To resolve this, please following the instruction carefully.

1. Stop your ERS Server (if it is currently running)
2. Download [patch-7.1.0-02.jar](#) (DO NOT change the name of this jar file)
3. Drop this jar into the 7.1.0 server */lib* directory (DO NOT drop this jar in the */ext* folder)
4. Start your ERS Server

- **MediaSize is overriding the MediaTray**

Problem Description:

The printer tray that was specified does not get used.

Problem Addressed:

- 1) If **OrientationRequired** is already specified, then do not override it
- 2) If **MediaTray** is already specified then do not set MediaSize

Patch Resolution:

To resolve this, please following the instruction carefully.

1. Stop your ERS Server (if it is currently running)
2. Download [patch-7.1.0-01.jar](#) (DO NOT change the name of this jar file)
3. Drop this jar into the 7.1.0 Server /lib directory (DO NOT drop this jar in the /ext folder)
4. Start your ERS Server

Note: This patch can be used for both ERS Designer and Server.
