Implementing Resource Bundles

Place the resource bundle file in *${ELIXIR_HOME}/ext/*

Define the locale using the dynamic parameter passed in from the report.

Call a function on Render Begins of the page header to initialize the Resource Bundle.

To test, the only four locales available for this bundle are:

   * French (fr,FR)

   * German (de,DE)

   * Chinese (zh,CN)

   * Japanese (ja,JP)

The Resource Bundle sample is available at the following link: [Using Resource Bundle](#).

To use the sample:

   1. Download 'ResourceBundle.zip' from the above link

   2. Unzip 'ResourceBundle.zip' to a folder

   3. Copy 'Labels.jar' and place at *${ELIXIR_HOME}\ext*

   4. Run Elixir Report Professional.

   5. Click 'Add FileSystem' and select 'Jar FileSystem'

   6. Enter 'KnowledgeBase' for Name and point to'ResourceBundle.jar' in the folder that you unzipped earlier.
