

Site Recommendations

The following are a list of external sites which you might find useful when developing with Repertoire:

- <http://regexlib.com> [Regular Expression is used for picking up the right data and doing data validation within Repertoire, check out the various regular expression on this site.]
- <http://www.connectionstrings.com> [Need to work with multiple database connections and lost in their URL syntax? Check out this site for sample connection strings.]
- <http://www.jfree.org/jfreechart/api/javadoc/index.html> [Need extra customization to the Chart Components? Check out the full API here.]
