

Importing Classes

Standard Java classes can be accessed by JavaScript using the **!ImportClass()** function that is available in Elixir Reports.

Code Snippet

```
importClass(java.util.Vector);
```

Access the method of the class using its name.

Code Snippet

```
v = new Vector();  
  
importPackage(java.lang);  
  
System.out.print("Hello ");
```

A sample on using ImportClass() is available at the following link:-

[ImportClass.zip](#)

To use the sample :

1. Download 'ImportClass.zip' from the above link.
2. Unzip 'ImportClass.zip' to a folder.
3. Copy 'Test.jar' to *\$ELIXIR_REPORT_PROFESSIONAL_HOME\ext*.
4. Run Elixir Report Professional.
5. Click **Add !FileSystem** and select **Jar !FileSystem**.
6. Enter 'KnowledgeBase' for Name and point to 'ImportClass.jar' from the folder that you unzipped earlier.
