

Manipulating the Properties of a Report Element

You can manipulate the properties such as 'Alignment', 'Width' and 'Left', of a report element using scripts.

The following example sets the element to be aligned left if the amount is greater than 100.

Code placed at 'On Render Begins' of the component

=Code Snippet=

```
if (sales > 100)
```

```
{
```

```
    this.setTextAlign("Left");
```

```
}
```

```
else
```

```
{
```

```
    this.setTextAlign("Right");
```

```
}
```
